

MIDDLEFIELD ROAD: COMPLETE STREETS IMPROVEMENTS

The City of Mountain View has plans for roadway repaving, including bikeway improvements on Middlefield Road from Moffett to Bernardo. In a virtual community meeting on June 21st, 2022, feedback was generated from twenty residents in attendance. Residents who could not attend provided feedback via email; eight emails were received. Over 1,700 postcards were sent out along with email and MyMV messaging.

CURRENT STATUS & FUTURE VISION

After a short presentation, residents were first asked which words came to mind when thinking of the project area, and they reported viewing the area as having **fast traffic** near **bike lanes**. Residents were then asked which words describe their future vision. Residents indicated **safe bike lanes**, **slower traffic**, and **no parking**.

BIKEWAY ALTERNATIVES

Residents were asked to rank four bikeway alternatives for the project area in order of preference.

Four Potential Bikeway Alternatives by Attendee Preference

Alternative A:
Part-time Bike Lanes / Parking
(Restripe Existing Conditions)

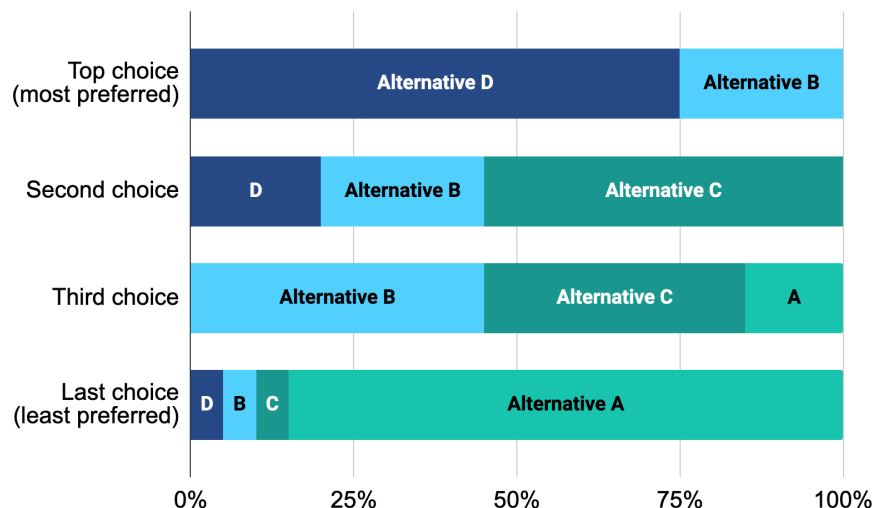

Alternative B:
Protected Bikeways
with Flexible Posts

Alternative C:
Protected Bikeway
with Concrete Median

Alternative D:
Protected Bikeway
with Trees and Groundcovers

The majority (75%) of participants listed a **protected bikeway with trees and groundcovers** (Alternative D) as their top choice. Participants expressed interest in using **native plants** watered with **greywater**. The remaining 25% of participants preferred **protected bikeways with flexible posts** (Alternative B). No participants selected restriping existing conditions (Alternative A) or a protected bikeway with a concrete median (Alternative C) as their top choice. Most residents (85%) indicated restriping existing conditions (Alternative A) as their last choice.
